EDUCATION

Santa Clara University | Bachelor of Science in Computer Science and Engineering; Minor in Marketing Expected June 2027

- **Relevant Coursework:** Software Engineering, Theory of Algorithms, Computer Networks, AI & Customer Analytics
- **Leadership:** Association for Computing Machinery (ACM) President, Women in CyberSecurity (WiCyS) Vice President

SKILLS

- **Languages & Frameworks:** C, C++, Python, Java, JavaScript, TypeScript, React, Next.js, Node.js, Express, Flask, Flutter
- **Tools, Cloud, & Concepts:** AWS, Azure, Firebase, Git, Bash, OOP, Networking, Security, Okta, Intune, CI/CD, RAG, IAM
- **Soft Skills:** Leadership, Team Management, Communication, Agile/Project Management, Problem Solving, Collaboration

EXPERIENCE

Cybersecurity Intern June 2026 – Aug 2026
Capital One | McLean, VA

- Engineered a full-stack enterprise customer experience portal using React, Node.js/Express, and CI/CD.
- Designed a centralized request portal replacing multiple application-specific customer experience workflows.
- Developed a secure 5-step intake workflow with role-based navigation and SSO authentication.
- Architected authenticated backend APIs integrating with enterprise services through a corporate API gateway.
- Secured backend infrastructure using least-privilege IAM policies and centralized secrets management.
- Implemented automated unit, snapshot, and jest-axe accessibility testing across the application.

Cybersecurity Associate (Promoted from Intern) June 2025 – Dec 2025
Palomar Specialty Insurance | San Diego, CA

- Deployed PowerShell/Bash scripts via Azure Intune to automate endpoint compliance monitoring.
- Designed Okta workflows automating group assignments and identity lifecycle exception handling.
- Audited Active Directory hygiene, penetration test results, and privileged user risk management.
- Triaged security alerts across cloud platforms and validated evidence for compliance audits.

Software Engineering Intern June 2024 – Aug 2024
Palomar Specialty Insurance | San Diego, CA

- Enhanced corporate portals using Next.js, React, TypeScript, Node.js, and responsive Sass frameworks.
- Developed XPaths for test automation using Java, Spring Boot, Selenium, and Pega.
- Streamlined Claims department operations by optimizing internal Jira business tools.

PROJECTS

Write Up – AI Writing Coach Platform (AI Kitchen Demo Night Best UX) Apr 2026 – June 2026

- Architected an LLM coaching pipeline splitting Flask (auth/storage) and Node/Express (RAG/AI).
- Integrated LLaMA 3.3 70B via Groq with local Python grammar heuristics for voice-preserving feedback.
- Engineered asynchronous feedback combining local heuristics with deep AI analysis.
- Built a React editor with persistent user profiles and adaptive feedback tracking.

MITRE eCTF – Red Team Lead Jan 2026 – Apr 2026

- Directed a specialized security team compromising remote Hardware Security Modules (HSMs).
- Orchestrated attack chains executing backdoored firmware and design files on remote HSMs.
- Bypassed hardware permission controls to exfiltrate protected data without authorized PINs.
- Managed agile milestones and technical documentation to capture multiple high-value flags.

Wildfire Recovery AI Platform – WiDS x Accenture Apprenticeship Pilot Jan 2026 – Apr 2026

- Coordinated the SCU team while building an end-to-end RAG pipeline using Jina and Pinecone.
- Engineered an insurance document ingestion workflow using OCR and PDF parsing.
- Integrated FEMA, Zillow, and financial datasets to ground Groq LLaMA responses.
- Developed a React/Firebase application enabling AI-assisted disaster recovery planning.

Hearo – Hack For Humanity 2025 | Winner Feb 2025

- Developed a background-running Flutter app utilizing Flask servers to process AI audio classification.
- Implemented secure, immediate data-deletion encryption logic to protect user privacy.

AWARDS

- AI Kitchen Demo Night 2026 – Best UX
- BroncoCTF 2026 – 3rd Place
- Hack for Humanity 2025 – Winner
- INRIX Amazon University Hack – Finalist
- INRIX Hack 2023 – Top 10
