EDUCATION

Santa Clara University | Bachelor of Science in Computer Science and Engineering; Minor in Marketing Expected June 2027

- **Relevant Coursework:** Data Structures, Computer Architecture & Networks, AI & Customer Analytics

SKILLS

- **Languages & Frameworks:** C, C++, Python, Java, JavaScript, TypeScript, React, Next.js, Node.js, Flask, Flutter
- **Tools, Cloud, & Concepts:** AWS, Azure, Firebase, Git, Bash, Data Structures & Algorithms, OOP, Networking, Security
- **Soft Skills:** Leadership, Team Management, Communication, Agile/Project Management, Problem Solving, Collaboration

EXPERIENCE

Incoming Cybersecurity Intern June 2026 – Aug 2026
Capital One | McLean, VA

- Selected for a competitive cybersecurity internship focused on enterprise-scale systems

Cybersecurity Associate (Promoted from Intern) June 2025 – Dec 2025
Palomar Specialty Insurance | San Diego, CA

- Automated endpoint compliance reporting using PowerShell and Azure Intune
- Designed IAM workflows in Okta to reduce manual access management
- Conducted vulnerability assessments and remediated configuration gaps

Software Engineering Intern June 2024 – Aug 2024
Palomar Specialty Insurance | San Diego, CA

- Built internal tools using Next.js, TypeScript, and Node.js to improve operational workflows
- Developed automated test suites with Java, Spring Boot, and Selenium
- Optimized usability of internal tools for non-technical users

PROJECTS

Write Up — AI Writing Coach Platform Apr 2026 – Present

- Built a full-stack AI writing coach using React, Flask, Node/Express, Firebase, and RAG-based feedback pipelines
- Integrated LLaMA 3.3 70B and retrieval over writing knowledge bases and draft history for personalized coaching
- Developed real-time grammar/style feedback, in-text suggestions, and adaptive learning through feedback tracking

MITRE eCTF — Red Team Lead Jan 2026 – Apr 2026

- Led red team operations targeting embedded hardware security modules, firmware analysis, and system-level attacks
- Conducted threat modeling and validated vulnerabilities under strict competitive constraints
- Managed documentation, agile milestones, and coordinated cross-team tasks

Wildfire Recovery AI Platform (WiDS x Accenture Apprenticeship Pilot) Jan 2026 – Apr 2026

- Built end-to-end RAG pipeline using Jina embeddings, Pinecone, and Groq LLM APIs
- Integrated FEMA, insurance, Zillow, and user intake data for contextual retrieval
- Developed a full-stack React + Firebase app enabling persistent chat memory and real-time interaction
- Tuned embeddings and prompt workflows to optimize retrieval accuracy and latency

Hearo – Hack For Humanity 2025 | Winner Feb 2025

- Built a Flutter + Flask app using AI audio classification to detect fire alarms and optimized mobile performance
- Designed frontend UI/UX and backend data flows for real-time notifications
- Ensured accessibility for deaf and hard-of-hearing users with tactile and visual alerts

LEADERSHIP

Vice President Oct 2024 – Present
Women in CyberSecurity (WiCyS) | Santa Clara, CA

- Lead organizational strategy, events, and cybersecurity-focused initiatives for members
- Partner with industry organizations to host speaker events and career development sessions

President Oct 2023 – Present
Association for Computing Machinery (ACM) | Santa Clara, CA

- Lead the largest computing organization on campus; oversee events and technical programming
- Manage the executive board and coordinate workshops, hackathons, and partnerships

AWARDS

- Hack for Humanity 2025 — Winner
- BroncoCTF 2026 — 3rd Place
- INRIX Amazon University Hack — Finalist
- INRIX Hack 2023 — Top 10
